PTaaS

Penetration Testing as a Service

PTaaS, or Penetration Testing as a Service, transforms how organizations safeguard their digital assets by eliminating the long wait between security assessments. Unlike traditional, one-time testing, PTaaS offers continuous, on-demand penetration testing through a cloud-based platform. This approach reduces time to discovery, allowing you to identify and address new threats as they emerge—rather than waiting months or even a full year to uncover vulnerabilities.

With real-time reporting and faster remediation, PTaaS ensures your security posture is always ahead of evolving threats. It's the smart, scalable way to protect your business without the burden of extensive internal resources.

Core PTaaS Offerings

INTERNAL PENETRATION TESTING

Uncover risks within your internal networks.

EXTERNAL PENETRATION TESTING

Uncover risks in your public-facing systems by simulating an external attack.

Additional Services

PURPLE TEAM EXERCISE

Collaborative security assessment where offensive (Red Team) and defensive (Blue Team) experts work together to identify and fix vulnerabilities in your organization's defenses.

MANAGED SECURITY

A comprehensive suite of outsourced security solutions, including continuous monitoring, threat detection, incident response, and infrastructure protection to safeguard your organization.

CONSULTING SERVICES

Expert guidance to assess risks, develop security strategies, and design resilient architectures for a stronger cybersecurity posture to reduce overall business risk.

Stay ahead of cyber threats with iON's PTaaS, a comprehensive solution that delivers monthly penetration testing to identify and address vulnerabilities in your network before they can be exploited. With PTaaS, you receive on-demand access to reports and expert insights, ensuring your business remains secure against emerging threats.

Don't wait for a breach—proactively protect your systems with PTaaS and keep your data safe.

Key Benefits

- 1 COST-EFFECTIVE**
PTaaS eliminates the need to hire full-time penetration testers, reducing costs associated with salaries, training, and benefits. With this service you receive 12 penetration tests per year, delivered monthly.
- 2 CONTINUOUS TESTING**
Unlike traditional annual penetration tests, vulnerabilities are discovered in near real-time, reducing exposure and accelerating remediation.
- 3 ACCESS TO EXPERTISE**
PTaaS delivers high-quality, cost-effective security testing by combining frequent, automated assessments with expert validation from our top-tier security specialists—ensuring the most critical risks are identified and addressed.
- 4 FASTER REMEDIATION**
With continuous testing and real-time reporting, your organization can address vulnerabilities more quickly, reducing the window of opportunity for attackers.
- 5 MONTHLY REPORTS & DASHBOARDS**
PTaaS offers detailed, on-demand dashboards and reporting, making it easier to track vulnerabilities, understand risks, and prioritize remediation efforts, while tracking trends over time.
- 6 QUARTERLY REVIEW SESSIONS**
Quarterly review sessions with a penetration testing expert to provide in-depth analysis and insights of your penetration test results.
- 7 ANNUAL STRATEGY PLANNING SESSION**
Start each year by reviewing your cybersecurity program with SMEs to review progress, identify trends, and create or update your roadmap for the coming year to reduce business risk.
- 8 LEADERSHIP BUY-IN**
Demonstrate the value of your cybersecurity investments to leadership by showing the real-time reduction in risk and exposure as vulnerabilities are immediately remediated.

“Choosing iON’s Penetration Testing service was a game-changer for us. Not only did we receive double the value, but it also came at half the cost compared to other alternatives.”

— Major Energy Corporation

Why iON?

EXPERTISE FROM A TRUSTED SOURCE

With over 20 years of specializing in cybersecurity, iON’s certified team has the technical breadth and depth you need. Our experience mitigating exposures enables your organization to mature your security program and capabilities.

TAILORED APPROACH

At iON, we customize our cybersecurity guidance according to your business drivers. Incorporating years of customer feedback, iON’s deliverables provide your organization with achievable recommendations and mitigation strategies. Having been on your side of the process, our practitioners understand how to balance technical complexity with user impacts to improve your security posture.

MEANINGFUL BUSINESS OUTCOMES

iON’s Penetration Testing goes beyond the traditional list of technical findings provided by other vendors. We provide a comprehensive, actionable roadmap with detailed recommendations and a narrative that helps you understand, replicate, and resolve your security risks.
